Outdoor Imperial Rounds

All outdoor GNAS imperial rounds are shot on a 122cm standard face with 5 zone scoring where Gold is worth 9, the Red 7, the Blue 5, Black 3 and White 1. On a round where two or more distances are shot the furthest distance is always shot first. You are allowed your sighters on the first distance but when the target moves forward you score straight away.

Indoor Rounds

Most rounds are shot on a standard target face using 10 zone scoring from the inner Gold (10) to the outer White (1). Compound archers can use the 3 spot face on a FITA 18 or 25, which only shows the inner 5 scoring zones to prevent arrow damage.

A Vegas round consists of 3 triangulated targets, showing only the inner five scoring zones. Scores of only 6 or above count. A single numbered arrow is shot at each face, if the wrong arrow hits the target it does not score. A Worcester round is on a 16" black and white five zone scoring face, with the 'gold' scoring 5. One target is placed above the other and each archer swaps targets every 2.5 dozen arrows.
